GALAXIA

A crocs between the arcade game "Defender" and the famous Spectrum game "Arcadia". Fly across an alien planet inhabited by some really nasty creatures. Ten swarms of nasties with totally different tactics, some even seem to talk! Multi-key scanning: you can fire, thrust and move up or down simultaniously! It may seem easy at first but watch out for the swarming spiders, bangers, bashers, spores and swoopers that fire diagonally, plus the super-fast darts,zappers and sly baiters. If you do well enough, try to dock with your starship for a bonus jet and more points!
